Recordkeeping without the chase.

At EROAD, we've revolutionized the IFTA filing experience – eliminating the need to chase down driver records, sift through paperwork and manually enter information. With EROAD's in-vehicle device, you'll be confident your entire fleet's data is accurately captured and securely transmitted. Its rapid ping rate, powerful mapping engine and sophisticated geofence tool are unmatched in the industry, allowing you to recreate every mile of every driver's journey.

Accurate data at your fingertips.

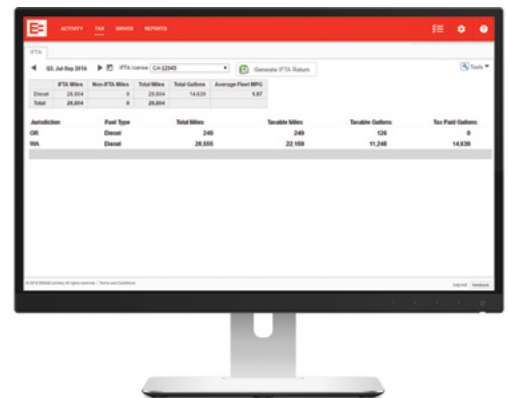

With EROAD's Electronic Tax Management solution, there's no need to rely on your drivers' manual data. Everything you need to know is automatically transmitted to EROAD's secure web-based application, called DEPOT, and is ready to access at any time. Easily view distance traveled, locations, routes, MPG and operational data. When you're ready to file your IFTA return, EROAD's new Easy File feature automatically generates it with one easy click of a button.

One platform. One end-to-end solution.

With EROAD's Electronic Tax Management solution, you'll capture, record and manage all of your data in one place. From automatically calculating mileage to generating the appropriate file format for your needs, EROAD puts everything at your fingertips, saving you time and effort at every turn. Compliance has never been more convenient.

EROAD. Confidence in every mile.

EROAD's IFTA Easy File is just one of the many ways EROAD is making your job easier.
